

Products Increasing Productivity

CL-1, CGF-1

Titration Kits for TRIM® Products

GENERAL DESCRIPTION

Master Chemical titration kits CL-1 and CGF-1 are used to check the concentration of TRIM® cleaners, coolants and corrosion inhibitors. Each kit contains a measuring vial, a flask or bottle for mixing, color change indicator solution, and a supply of sulfuric acid. Kit CL-1 is intended for checking aqueous cleaners and corrosion inhibitors. Kit CGF-1 is used to check concentration of coolants.

Kit CL-1

- Carrying case and instructions
- 15 ml dropper bottle of Methyl Orange indicator (Indicator B)
- 15 ml dropper bottle of phenolphthalein indicator (Indicator A)
- 15 ml dropper bottle of Sulfuric Acid (titrant)
- 120 ml reserve bottle of Sulfuric Acid
- 6 ml measuring vial
- 35 ml mixing jar

Kit CGF-1

- 15 ml dropper bottle of Bromocresol Green Methyl Red
- 15 ml dropper bottle of Sulfuric Acid (titrant)
- 120 ml reserve bottle of Sulfuric Acid
- 35 ml mixing jar
- 6 ml measuring vial

For additional applications information, please contact your Master Chemical Distributor, District Manager, the Tech Line at 1-800-537-3365, or our web site (www.masterchemical.com).
